

EX.NO:6 – Demonstrate the Immutable Nature of Wrapper Classes (Integer and Double)

Program

java

```
public class WrapperImmutability {  
    public static void main(String[] args) {  
        Integer num1 = 10;  
        Integer num2 = num1;  
        num1 = num1 + 5;  
  
        System.out.println("num1: " + num1);  
        System.out.println("num2: " + num2);  
        System.out.println("Are num1 and num2 same object? " + (num1 == num2));  
  
        Double d1 = 5.5;  
        Double d2 = d1;  
        d1 = d1 * 2;  
  
        System.out.println("d1: " + d1);  
        System.out.println("d2: " + d2);  
        System.out.println("Are d1 and d2 same object? " + (d1 == d2));  
    }  
}
```

Output

num1: 15

num2: 10

Are num1 and num2 same object? false

d1: 11.0

d2: 5.5

Are d1 and d2 same object? false
